Companion Selection Process

I have been receiving some resistance to our select-in-advance companion procedure. There are two ways to select a companion. They are select in advance and a line-up. The fact is that the companions do not like the line-up. It makes them feel like meat in a market.

While it does not apply to us, if you have a line-up, the girls work in a brothel nearby. This blows the medical safety explanation (very few clients) out of the water.

New Companions

I have two active recruiters. One of the recruiters finds it more difficult to get girls to show up for photo sessions than she had originally assumed. It is necessary to have control over all aspects of the service delivery. Otherwise, things will break and could cause service interruptions. It is very easy to be released as a companion that it is to become one of our companions.

I have separated the recruiting and managing of the companions from the actual operation of the hotel

Payments and Payment System

For the convenience of our guests we offer payments that include 3rd party funds transfer providers. In addition, Periastron has engaged a service corporation to collect funds on our behalf from International and US customers. There is a fee for this service. However, it is fee that we pay in its entirety.

Payment Methods (Our bank is Wells Fargo)

- Wells Fargo account holders can send funds to an account number or email address.
- International and US guests can send a wire, that is, bank-to-bank, funds transfer. If you use this method, use an unambiguous 11 Character SWIFT code. SWIFT is **always** 11 characters.
- Guests who plan ahead may send a cashiers check / Bank Draft drawn a US based bank.
